

Demonstration of Proposed Features

Date	01 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document presents the key features proposed for the Credit Card Approval Prediction project and their implementation status. It highlights the functionality developed during the project and verifies whether each feature was successfully demonstrated. The document serves as evidence of the successful completion and validation of the proposed solution.

S.No	Feature Name	Feature Name	Status	Demonstrated	Remarks
1	Applicant Data Entry	Allows users to enter applicant personal and financial details through the web interface.	Implemented	Yes	Successfully tested.
2	Data Preprocessing	Cleans, encodes, and prepares input data for machine learning prediction.	Implemented	Yes	Working as expected.
3	Credit Card Approval Prediction	Predicts whether a credit card application will be approved or rejected using the trained ML model.	Implemented	Yes	Accurate prediction generated.
4	Model Comparison	Compares Logistic Regression, Decision Tree, Random Forest, and XGBoost to select the best-performing model.	Implemented	Yes	Best model selected successfully.
5	Flask Web Application	Provides a user-friendly interface for entering applicant details and displaying prediction results.	Implemented	Yes	Interface functioning correctly.
6	Cloud Deployment	Deploys the trained model using IBM Watson Machine Learning for real-time predictions.	Implemented	Yes	Successfully deployed.

Feature Implementation Summary:

Item	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
