

Project Demo Planning

Date	01 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A structured demo plan was prepared to present the Credit Card Approval Prediction project in a clear and organized manner. The demonstration highlights the project objective, machine learning workflow, application features, and prediction results. Responsibilities were assigned among team members to ensure a smooth and effective presentation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and problem statement.	2	Kaveri
2	Dataset & Model Overview	Explain the dataset, preprocessing, feature engineering, and machine learning models used.	4	Pranav
3	Model Performance	Present the comparison of Logistic Regression, Decision Tree, Random Forest, and XGBoost, and explain the selected model.	3	ReethuSri
4	Live Application Demo	Demonstrate the Flask web application by entering applicant details and showing the approval prediction.	4	Sushma
5	IBM Watson Deployment	Explain the cloud deployment process and real-time prediction capability.	2	Sushma
6	Conclusion	Summarize the project, outcomes, and future scope.	2	Kaveri

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for automating the credit card approval process.
2	Solution Overview	Describe the machine learning workflow, technologies used, and overall system architecture.
3	Live Feature Demonstration	Demonstrate applicant data entry, prediction generation, and display of the approval result.
4	Q&A Session	Answer questions related to the project, implementation, and model performance.
