

Solution Architecture

Date	01 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	<i>Provides the user interface where applicants enter their personal and financial details and view the credit card approval prediction result.</i>	<i>HTML5, CSS3, Jinja2 Templates</i>
<i>API Gateway</i>	<i>Receives user requests from the web interface, forwards them to the Flask application, and returns the prediction results to the user.</i>	<i>Flask (Python Web Framework)</i>
<i>Microservices</i>	<i>Processes input data, performs preprocessing, loads the trained machine learning model, predicts credit card approval status, and generates the response.</i>	<i>Python, Scikit-learn, Pandas, NumPy, Joblib</i>
<i>Database</i>	<i>Stores the training dataset and the trained machine learning model used for prediction.</i>	<i>CSV Files (application_record.csv, credit_record.csv), model.pkl, encoders.pkl, columns.pkl</i>
