Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://credit-card-approval-prediction-eo1d.onrender.com/
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Render
Repository Link	https://github.com/sushmarangu2007-collab/credit-card-approval-prediction
Demo Video Link	https://drive.google.com/file/d/1Ra_1Crouzu2z6D0we2D---LyovUzrOgU/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the GitHub repository.
2. Open the project folder in Visual Studio Code.
3. Install the required dependencies using:
 - **pip install -r requirements.txt**
4. Start the Flask application:
 - **python app.py**
5. Open your web browser and go to:
 - **http://127.0.0.1:5000**
6. Enter the applicant details and click **Predict** to view the credit card approval prediction.

Alternatively, access the deployed application using:

<https://credit-card-approval-prediction-eo1d.onrender.com/>

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The application predicts using only the trained dataset and selected features.	Can be improved by training with larger and more recent datasets.
2	The free Render service may take a few seconds to wake up after inactivity.	Wait a few seconds and refresh the page.
3	The current system does not support user authentication or application history.	Can be added in future versions using a database and login system.
